

- It is **very rare** in Colorado for child fatalities to occur as a result of abuse and/or neglect.
- Colorado's child population (ages 0 through 17 years) is estimated to have grown by **4%** from 2009 to 2014.
- The number of children referred to Colorado's child welfare system increased by **12%** from 2009 to 2014.
- The rate of child fatalities per million children in the Colorado child population, where the county had prior involvement declined from **9** per million in 2009 to **7.2** per million in 2013. In 2014, the **rate increased to 14.2** per million.
- The rate of child fatalities per 100,000 children referred to Colorado's child welfare system in which the county had prior involvement declined from **7.8** per 100,000 in 2009 to **5.7** per 100,000 in 2013. In 2014, the **rate increased to 11.4**.

**CHILD FATALITIES DUE TO ABUSE OR NEGLECT WITH PRIOR COUNTY INVOLVEMENT RELATIVE TO CHILD POPULATION AND CHILDREN REFERRED TO CHILD WELFARE**

Colorado's child population (under 18 years old) is estimated to have grown by **4%** between 2009 and 2014. Similarly, the number of children referred to Colorado's child welfare system increased by **12%** over this same period. The table and chart below show Colorado's child fatalities with prior county involvement per 1 million child population and per 100,000 children referred during that time period.

While even one child fatality due to abuse or neglect is too many, it is important to note that child fatalities where there had been prior county involvement are relatively uncommon in Colorado and have declined slightly from 2009 to 2013, with a small increase in 2014.

**Child Fatalities Due to Abuse or Neglect with Prior County Involvement Relative to Child Population and Children Referred**

Year	Children Referred	Child Population	Fatalities Due to A/N with Prior County Involvement*
2009	141,181	1,216,230	11
2010	150,638	1,227,666	12
2011	148,804	1,234,288	21
2012	156,197	1,240,948	9
2013	156,564	1,255,510	9
2014	158,368	1,264,587	18
